- No added sweeteners or sugars
- Whole food juices
- Huge pre-sold market (*Who doesn't LOVE chocolate?*)
- Supports and promotes healthy immune system function, healthy blood pressure, healthy blood sugar levels, healthy cardiovascular function[†]
- Tastes great with your favorite juice, water, milk, or even cheese cake!
- Boosts energy, mood and libido[†]

Dark Chocolate is world-renown for its high antioxidant value, supporting optimal health and wellness. TLC has taken this to a new level of nutritional value with the addition of highly sought after exotic fruits from around the world, including Açai, Mangosteen, Cupuaçu, Goji (Wolfberry) and Cherry.

Açai, the fruit of a palm tree ("The Tree of Life") that grows in the rainforests of the Amazon, is known to have ten times more antioxidants than red grapes and 10 to 30 times the anthocyanins (polyphenols that give fruits and vegetables their deep color and are high in antioxidant value) of red wine! Antioxidants, which include the Vitamins C and E that are found in the Açai fruit, help to neutralize oxygen-free radicals, which are an unhealthy by-product of the process the body uses to turn food into energy. Açai also has a high concentration of Omega 6 and Omega 9 fatty acids, which help fight the buildup of LDL, or bad cholesterol, in the body while also helping support HDL, or good cholesterol. The benefits of Açai are endless, as they promote cardiovascular and digestive health and contain a large range of vitamins and nutrients including Vitamins B1, B2, B3, C, E, Potassium, Zinc, Magnesium and Phosphorus.

Mangosteen is recognized for the incredibly potent antioxidant power of its phytonutrient xanthenes. Xanthenes are the most highly active antioxidants found in the mangosteen fruit and come predominately from the rind or outer shell portion of the fruit. Xanthenes are a biological class of phytonutrients that are very stable and have been found to exhibit strong antioxidant activity. Mangosteen has over 40 naturally occurring xanthenes!

From deep in the Amazon Rainforest comes a delicious exotic fruit called the **Cupuaçu** (pronounced coo-poo-ah-sue). Known as "The Taste of Brazil", this fruit is used in juices, jams and other tasty treats. In addition to its many antioxidant properties, Cupuaçu has been touted as supporting a healthy digestive tract, boosting the immune system and promoting energy and libido[†]. This highly sought-after fruit contains phytonutrients called polyphenols and theograndins (super-antioxidants) and several other antioxidants including vitamins A, C, B1, B2, B3 as well as essential fatty acids and amino acids – which is why we call it a complete super-fruit!

Goji berry is the common name for the fruit of two very closely related species: Lycium barbarum and L. chinense, two species of boxthorn in the family Solanaceae. Although its original habitat is obscure (probably southeastern Europe to southwest Asia), goji berry species currently grow in many world regions.

The **cherry** belongs to the family Rosaceae, genus Prunus, along with almonds, peaches, plums, apricots and bird cherries. The subgenus is native to the temperate regions of the Northern Hemisphere, with two species in America, three in Europe, and the remainder in Asia. Cherries contain anthocyanins, the red pigment in berries. Cherry anthocyanins have been shown to reduce pain and inflammation in rats. Anthocyanins are also potent antioxidants under active research for a variety of potential health benefits.

Nutrition Facts

Bottle Size: 25.36 fl. oz. / 750 mL

Serving Size: 1 fl.oz. (2 tablespoons)

Servings per Container: 25

	Amount per Serving	% Daily Value*
Calories	19	<1%
Total Carbohydrates	4.5 g	<1%
Sugars (from fruit concentrates)	4.5 g	**

Proprietary Blend 11,680 mg

Extract Cocoa Bean, Mangosteen Whole Fruit Pulp, Mangosteen Whole Fruit Extract, Red Sour Cherry Concentrate, Mixed Fruit Concentrate, Açai Fruit Pulp, Goji Berry Whole Fruit Extract, Cupuaçu Juice Powder, Bioperine (Piper Nigrum Extract), Momordica Charantia
